

The Intent

The intent of our curriculum is simple... we want to grow children into young adulthoods who have rich and diverse knowledge about the world around them, can make informed decisions because they know and understand their rights and finally, are independent and safe as they grow through their life stages.

Our big 6 encompass this intent and are specifically chosen to ensure we meet the needs of our students and the way in which they co-exist in the world around them.

Humankind

To understand the workings of the body both physically and mentally and how the interactions between humans can change the world.

Nature

To experience the diverse natural environment that we co-exist in and how our behaviours over time change the natural beauty around us.

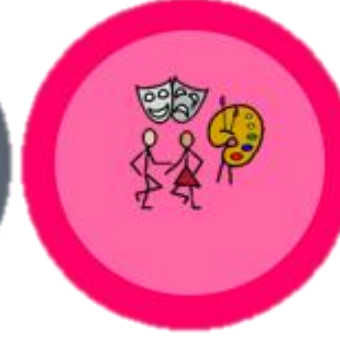

Place & Space

Allows us to explore the visual, cultural, social and environmental aspects of the world around us and beyond by growing an appreciate and bond between ourselves and the places that we grow within.

Exploration

Allows us to be curious about ourselves, others and environment around us. By doing so we grow in confidence to make informed and sensible decisions.

Creativity

Through being creative we become expressive, persistent, determined and resilient in our self-expression and ability to cope with the world around us.

Rights

To understand that we have rights as an individual that impact both positively and negatively on others that we interact with.
