

Learning Pathways

At Discovery we believe every child is unique and deserves a bespoke and ambitious curriculum offer.

Each term we set a series of targets in each subject area. These are hand-selected for each individual based on their strengths, passions and areas for development. These targets allow us to track and celebrate the progress our children make day by day.

Our pathways allow us 'zoom out' and consider our longer-term goals for our young people.

Pathway 1

Our **Pathway 1** children have demonstrated an ability to access a robust academic programme with the aspirational goal of completing up to five GCSE qualifications alongside a BTEC qualification of their choice and a Functional Skills ICT qualification. It is our hope that these children will have the option to access a mainstream post 16 offer, with support.

Pathway 2

Most of the children at Discovery are on **Pathway 2**. These students will access a range of GCSEs, BTEC and Functional Skills qualifications depending on their own particular interests and strengths. It is our hope that these children will have the option to access a post 16 offer at a SEND specialist provision.

Pathway 3

Our **Pathway 3** children will be best supported by a broader and more holistic offer. These children are likely to have a higher degree of access to sensory, speech and language and occupational therapy interventions as per their level of need. This will ensure they have a curriculum offer that both meets their needs and enhances their skills and knowledge. We aspire for all our students to leave Discovery with Entry Level qualifications in English, Maths and ICT.
